24/7, Private Cloud Solution for Home Users

Forget and leave your USB drives behind. Synology DS220j is an entry-level network-attached storage supporting RAID 1 configuration to prevent data from sudden drive failure. Consuming only **12.46 watts** during access and **5.06 watts** during HDD hibernation, DS220j is energy-saving and ideal to serve 24/7 without depleting your wallet. With high data transmission speed at over **112 MB/s sequential reading and writing²**, your household members can smoothly store, share, and back up data whenever you want.

Synology DiskStation Manager (DSM)

DSM is a web-based operating system that provides an intuitive data management experience and supports different computer platforms.

Powered by Synology DiskStation Manager (DSM)

DSM is a web-based operating system that provides private cloud services. It is designed to simplify your daily task management. The multitasking web interface allows you to run multiple applications simultaneously on one browser tab and instantly switch between them. The intuitive DSM allows you to effortlessly configure storage capacity, gives you complete control over your personal cloud, and lets you access your Synology NAS from anywhere.

The built-in **Package Center** allows you to download and install the packages designed to satisfy different user needs, such as sharing files on the cloud, sharing photos on an online album, or setting up a VPN environment. Tasks can be done with just a few clicks.

Cross-platform File Sharing

DS220j comes with comprehensive support of networking protocols — FTP, SMB2, SMB3 (encrypted), AFP, NFS, and WebDAV — and provides seamless file sharing across Windows®, macOS®, and Linux® platforms.

Cross-platform File Sharing and Data Synchronization

Synology DS220j supports comprehensive network protocols, ensuring a seamless file sharing experience across Windows®, macOS® and Linux® platforms. **Cloud Sync** keeps your Dropbox, Google™ Drive, Microsoft® OneDrive, Baidu, and Box storage in sync with your personal DiskStation at home. **Synology Drive** allows you to synchronize files across different computer and mobile platforms, effortlessly keeping everything up-to-date. DS220j combines seamless file sharing capability with a high level of security, including HTTPS support, a built-in firewall, and multiple IP and account intrusion auto-blocking mechanisms.

Personal Multimedia Bank

Real-time video streaming provides hassle-free and high-quality video playback among various devices.

Your Personal Multimedia Library

DS220j helps you easily manage and share your multimedia content. With **Video Station**, you can organize your personal digital video library using comprehensive media information. **Audio Station** comes with Internet radio, lossless audio format support, and provides music playback via DLNA and AirPlay® devices. **Photo Station's** intuitive design allows professional photographers to effortlessly organize photos into customized categories, smart albums, and link them to social media sites with just a few clicks. As a brand-new photo solution for personal and home use, **Moments** promises users a modern browsing experience by offering mobile photo backup, photo sharing, image recognition, and similar photo detection.

Available Anytime and Anywhere

Synology provides mobile applications for you to enjoy your multimedia library anytime and anywhere. Available on iOS and Android™ platforms, **DS photo**, **DS audio**, **DS video**, and **DS file** allow access to your Synology NAS respectively through **Photo Station**, **Audio Station**, **Video Station**, and **File Station**. **QuickConnect** allows connection to your Synology NAS via a secure and customizable address, so that you can instantly access media and work files.

Easy Backup Solutions

Synology **Hyper Backup** provides multi-version backup with block-level incremental backup and cross-version deduplication. It optimizes storage utilization and allows data to be backed up to multiple destinations such as local shared folders, external hard drives, network shared folders, rsync servers, and public cloud services.

Synology Drive Client provides real-time or scheduled backup of important folders of your computers to prevent accidental deletion and ransomware threats.
